◆ FOLD ALONG THIS LINE, TOP PANEL BACK — STANDS LIKE A TENT ◆

NOTES

- 1 Feed your stiff starter 8–12 hrs ahead — ripe when the dome flattens and just starts to crack.
- 2 Soften the starter into cold milk, then mix in the flours, sugar, salt, and dough butter. Stop at smooth & cohesive. Target DDT 68–72°F.
- 3 Flatten, wrap, and chill at least 1 hour.
- 4 Roll cold European-style butter into an even block, two-thirds the size of the détrempe.
- 5 Encase the butter (envelope fold), then laminate with 3 single folds, chilling 30–45 min between each.
